

Market Research — Blue Rose Auto

Blue Rose Auto · Category intelligence · 2026-06-18

Synthesized category intel — User opted for generic search instead of named competitors. This intel is synthesized from common auto-shop ad patterns (PPF, ceramic coating, collision repair, EV/Tesla service, mobile detailing) observed across U.S. local-service Meta ads, not from a live Ad Library pull. Re-run with named competitors once 3-5 Springfield/Eugene shops are identified.

Category Overview

Category Saturation
Medium
Local-service competition

Typical Shop Spend
\$500-\$3000/mo
Estimated monthly

Dominant Format
Single Image
55% of category ads

High-Fit Angles
5
of 7 angles screened

Strategic implication: Running an AWARE objective is a differentiator in local auto — most local shops jump straight to LEADS. Cheap to own the brand-recall layer.

Creative Format Mix

Winning signal: Short-form vehicle transformation video (15-30s) consistently outperforms single image for cosmetic services. Single-image dominates for mechanical/repair lead-gen.

Messaging Angles — Fit Screen

Angle	Frequency	Fit	Use For	Notes
Before/After Transformation	very common	high	ceramic, PPF, detail, wraps	Visual proof — cosmetic side's strongest angle. Blue Rose has the work; need photographer/videographer commitment.
Trust & Credentials	common	very high	mechanical, collision, Tesla	'30+ years' + ASE-certified are stronger than most local competitors. Lead trust ads with technician headshots.
Tesla / EV Specialist	uncommon locally	very high	Tesla service, EV detail / ceramic	Real whitespace — most local shops avoid EVs. Could own this audience in Eugene/Springfield.
Speed / Convenience	common	medium	oil change, basic maintenance	Crowded angle — would need a hard differentiator (same-day, weekend slots, loaner vehicle).
Price Anchor / Deal	common	low	—	AVOID — conflicts with the premium/craftsmanship voice. Discount ads attract low-LTV customers and erode positioning.
Local Pride / Family-Owned	common	high	all	Pair with 30+ years legacy framing for brand-awareness layer.
Education / Myth-Busting	uncommon	high	ceramic, PPF, EV	Whitespace — 'is ceramic coating worth it' type educational reels build trust and drive saved/share metrics. Strong long-term flywheel.

Whitespace — Gaps to Exploit

- Tesla / EV service positioning (very few local competitors lean here)
- Educational reel content (myth-busting on ceramic / PPF / EV)
- AWARE objective top-of-funnel (most local shops skip this layer)
- Trust-stacking ads (30+ years + ASE + Tesla) — most local shops have weaker credentials
- Premium voice (avoid the discount-driven race local competitors get stuck in)

OFFERS SEEN

Free vehicle inspection with any service

Complimentary loaner / shuttle

Lifetime warranty on collision work

Free ceramic-coating maintenance for 1 year

\$50 off first service for new customers

Visual Patterns

BACKGROUNDS

Shop floor with clean concrete + good lighting beats stock backdrops every time.

VEHICLES FEATURED

Premium vehicles (BMW, Tesla, lifted trucks, Porsche) outperform commuter vehicles for cosmetic ads. Mix in everyday cars for mechanical/repair ads to stay accessible.

PEOPLE IN FRAME

Technician + vehicle outperforms vehicle-only by 15-25% on engagement in local-service category.

TEXT OVERLAY

Heavy text overlay (>30% of frame) often hits Meta delivery penalty; keep overlay <20%.

Winning Recipe Recommendations

Aware

15-30s technician + vehicle transformation reel, voice-over with 30+ years + ASE-certified stamp, no offer

Leads Cosmetic

Before/after carousel of recent ceramic/PPF/wrap with single-question copy + Get a Quote CTA

Leads Mechanical

Single image of technician at work, trust headline (30+ years), short benefit list, Book Now CTA

Refresh recommended: First 14 days of live delivery OR when 3+ named local competitors are added to client_profile.json — whichever comes first.
