

Meta Account & Page Audit

2026-06-25 · Page 1709708972688957 · Ad acct act_1999616770762846 · pre-audit reused from blueroseauto

Overall health

Weighted across page completeness, pixel health, audiences, naming, posting consistency, engagement, and account financials. Components blocked by permissions are dropped and the rest renormalized — not scored as zero.

Top wins

- ✓ **Paid infra mostly in place** — active ad account (act_1999616770762846, USD) + an installed pixel mean the heavy setup is done.
- ✓ **Real warm audience** — 1,764 Page followers earned organically; a ready seed for retargeting + lookalikes. Page completeness is 100/100.
- ✓ **Strong native-video habit** — the page built its following on video content (96% of historical posts), the format Meta rewards.

Top issues

- ! **Pixel not tracking** — it exists in the account but is NOT installed on blueroseauto.com (corroborated by pre-audit scrape); 0 real events. Blocks conversion optimization.
- ! **Page dormant 83 days** — last post 2026-04-03, zero posts in the last 60 days. The content engine that built 1,764 followers has stalled.

! **Instagram not linked** to the Page — IG data is only a public pre-audit estimate (≈420 followers); blocks IG placements, insights & the unified inbox. No custom audiences built yet.

Pixel / tracking

● **Corroborated:** Pixel exists in the ad account but is NOT installed on the website (confirmed by pre-audit scrape) — it cannot track real traffic. Top conversion-tracking blocker.

Website & tracking from pre-audit

SIGNAL	STATUS
Meta Pixel installed on site	no
Conversion events on site	no
Google Analytics 4	yes G-XV9SFWPKVL
Google Tag Manager	yes GT-M6XH7GFT
Mobile responsive	yes
Ad Library history	NEVER_RUN

Engine readiness

ASSET	STATUS
Facebook Page	ready (page token)
Instagram	not linked (estimate only) · 420 pre-audit estimate
Ad account	active
Pixel firing	none

Recommended next steps

- 1 **Install & verify the pixel** on blueroseauto.com — deploy base code site-wide, add Lead + Schedule + PageView events, enable advanced matching, confirm firing in Test Events (add CAPI for resilience). Top unblocker.

- 2 **Confirm a payment method** on the ad account and **link @b1ueroaseauto** to the Page (unblocks IG placements + insights).
 - 3 **Resume organic posting + build seed audiences** — restart 1–2 videos/week to re-warm the 1,764-follower base, then create the first Custom Audience (engagers + pixel traffic) → lookalikes.
-

Generated by smOS /audit on 2026-06-25. Baseline scope: organic + account-readiness (no paid spend history). Immutable baseline for future before/after comparisons.
